KILL TWO PRISONERS

MOTHER OF "DOLL BABY" TWINS IS FREED OF MURDER CHARGE

Judge Rules State Has Failed to Prove the Infants Are Not Still Alive—Thrilling Movie Climax as Verdict Is Announced.

[By Associated Press.]
HAMMOND, IND., Oct. 20.—Mrs.
Hazel McNally, alleged mother of
Hammond's "doll haby" twins, was
freed today of the charge of murdering the mysterious infants when Judge Henry C. Cleveland ruled that the State had falled to prove the in-fants are not still alive.

The 26-year-old wife, who has grinned and giggled through four days of preliminary hearing white witnesses attempted to fasten on her the charge of double murder, col-lepsed and fell fainting to the floor with the cheers of 150 women court-room fans applauding her acquittal

By a strange paradox of the law. the defense, which maintained the twins "born" to Mrs. McNally last December were only inanimate crea-tions of china and straw dressed in

yers' phraseology for the "body of the crime," proved a stumbling-block to the State, and because of it the mystery of the McNally twins, whether they ever existed, whether they were only dressed-up doils, or whether, as the State contended, they were first real bables and the state. were first real habies and then dol's were first real babies and then dol's, remains unsolved. Sustaining the motion of Samuel Swartze, attorney for Mrs. McNally, for dismissal of the charge, Judge Cleveland ruled that some proof that a dead body actually existed; that it came to list death by violence, and that the person charged with the crime was in some way connected with its commission was necessary before a charge of murder could be supported. Hundreds of women and a few men fought and claimered and scretched.
